* Solar Reflectance Index (SRI) * Solar Reflectance (SR) * Thermal Emissance (TE)

Other finishes are available, including 16-ounce copper, zinc, stainless steel and bonderized metal. Contact EXCEPTIONAL Metals for information.

* Gravel stop covers, 2-piece compression metal and fascia bar covers ordered in these finishes are available within five business days. Products ordered in all other finishes may require additional fabrication time.

♦ Available at additional cost.

★ .032 aluminum is for standing seam products only.

Specially ordered products will be filled as quickly as possible and shipped separately. Call for quotes.

Galvalume® Plus

EXCEPTIONAL® Metals offers a mill finished Galvalume® with a two-sided, clear chromate/acrylic finish that simultaneously aids roll forming without the use of lubricants and eliminates unsightly handprints or stains resulting from handling and storage. The acrylic finish dissolves naturally over a period of time, and when left as is, allows for natural and even weathering.

Our Metal Products Are Environmentally-Friendly

EXCEPTIONAL Metals products utilize metals with either Kynar 500® or Hylar 5000® resins, which provide superior color retention. These metal products are highly reflective and meet EPA ENERGY STAR® Roof Products Program performance criteria. Products made by EXCEPTIONAL Metals are 100% recyclable.

Warranty

EXCEPTIONAL Metals offers a finish and substrate warranty. Coating warranty varies for Regal Red, Matte Black, Copper Metallic, Silver Metallic, Champagne Metallic, and Pre-Weathered Galvalume®. Metallics are warranted for chip, crack, and peel only. Contact the membrane manufacturer for any additional warranty that may be offered.

Oil canning is an aesthetic issue and is an inherent part of light gauge cold formed metal products. By using coil that has been processed properly, designing for thermal movement, following stringent specifications for installation and proper handling most oil canning can be eliminated. Oil canning is not grounds for coil/panel rejection.

Colors shown represent the actual color as closely as possible. To ensure exact color for final approval, a metal color chip is available.
